WELCOME TO RICHMOND.

the Society of American Mechanical Enbegan their meetings in this city The Christian Association ets later in the week, and it is expected ere next week. While those wi are particularly interested in these several bodies of influential men will devote ints of interest for the visitor bent be delighted no doubt at the signs of indus, trial progress here given by the locomotive, smaller and more special manufactories They will have an excellent hint of the industrial future of the South. To all of them THE TIMES, in the name of Richmond, extends a warm welcome.

TARIFF BACILLUS.

Consumption had attacked the Common wealth. On its face the country had a color, but investigation showed that it was but a hectic glow. The dread disease was working through all parts of the body Its effect were felt in New England, Pennsylvania, Alabama and Kansas No section escaped. Many wise looking sound, shook their ved consumption could be cured. Stead ily the victim grew weaker, and as was his weakness of body so was the strength under which the as kept him. Finally, physician, the Protessor Koch of poli ties, appeared on the scene. He was hon opinions and to stand by them. Boldy he ced that the body politic was dying the bacillus-the protective tariff. "Quack, cried the physicians, who were enjoying use retaining fees. And the people even were afraid to be con losing the fee he was already enjoying he continued to express his opinion about the disease. He did not stop at that. Having carefully explained the origin of the poisonous bacillus in the transfusion of the black virus of Radicalism he pointed out the remedy. The patient must be inoculated with pure Democracy. Some specimen phials of Democracy were submitted to the Professor, but he rejected them as he found them tainted.

He was as hear death as a man possible out bis place on the trie to me of the celebrated mineral waters of this country and obtained only temporary relief. He visited this place and has been using the Chase City Lithia Water since 24th of their homes in the South. That is the big come when the manufacturous have got to come when the manufacturous have got to do me when the manufacturous have got to come when the manufacturous have got to do me when the manufacturous have got to me with the origin of the poisonous bacillus in the transfusion of the chase City Lithia Water since 24th of how can man understant the come when the manufacturous have got to come when the manufacturous have got to get near to the new consumers that have been hatched out the remedy. All this time the consumption was tightening its hold on the kill it rather than that another should receive their tees. But the country began to grow suspicious under the treatment, par. ticularly in those sections where the vitals were being attacked. It was slightly nauseating, perhaps, to some parts to undergo inoculation, but death must be avoided. So the treatment of Professor

BASIC CITY.

"Well, because it was the best site for a manufacturing city that we were able to find in the South. We didn't select it in a hurry. Some of us went over the routelear from Hagerstown down this Valley and on to New Orleans; some of us went over the ground from San Francisco to the Atlantic, and we found no place which combines everything a factory wants as Basic City does. A factory on a single fine. It's like running a business and having another man to have the veto power on it. One railroad can have the veto in your own had and helps to get good rates. No manufacturing on a single line of railroad can half appreciate the advantages of being at the junction of competing lines. They won't make you wait for cars ofton, I tell you. Basic city is at the junction of competing lines that will lake your products to every part of this and and to deep water, and that is worth los of monoy to a manufacturer. The cach of it—the cheap coal, the c

"Oh, a few days more. Mr. Brann, there, wants to look around into the lumber supply of this region. I have some friendshere. My wife is the niece of Hon. Marshall Hanger, of your town, and I have been visiting some of her connections in the county."

The Central Land Company of Newport News is putting on the market some of the most valuable property within less than one mile from the very heart of that growing city. On the 21st day of this month this company will sell at public auction seven hundred lots, and they will be sold on the most favorable terms.
